

Instant Brazilian Keratin Treatment with Collagen

FAST, AFFORDABLE, INCREDIBLE RESULTS!

Looking for frizz-free and smooth hair for a fraction of your time and money?

Rejuvenol Instant Brazilian Keratin Treatment is formulated to eliminate frizz while maintaining your beautiful curls. This treatment can last 4 to 6 weeks.

Rejuvenol Brazilian Instant Keratin Treatment can be used when cutting hair.

Our treatment can be offer at the same time as a hair cut adding only an extra 20 minutes to the appointment.

Use Brazilian Instant Keratin Treatment as a Color Locking Agent

When color is applied, the cuticle is wide open due to the chemical process. Applying Rejuvenol Instant Brazilian Keratin Treatment on recently colored hair will increase the longevity of the color as well as shine and vibrancy, 2 steps in 1 that will amaze the client with the stunning results. No need to clarify.

Questions & Answers

Q. What is Rejuvenol's Instant Keratin Treatment?

A. Rejuvenol's Instant Keratin Treatment is a glaze-like treatment formulated for the client who doesn't want any residue on the hair. It takes less time, less money and less hassle than traditional keratin treatments to achieve smoother, shinier, healthy hair with out frizz.

Leave on period: At least 24 hrs. Longevity(*): 4-6 weeks.

Q. What's the difference between Rejuvenol's Brazilian Instant Keratin Treatment and most traditional keratin treatments?

A. Rejuvenol's Instant Keratin Treatment offers clients the best conditioning/smoothing results, but at a fraction of the time and the lowest cost of existing treatments. Curly hair would stay curly with no frizz and a healthy looking appearance.

Q. How long does it take for a complete Brazilian instant Keratin Treatment service and how long does it last?

A. Approximately 35 minutes, based on average hair length and density. Results last an average of 4-6 weeks.

Q. What is the result of the treatment?

A. Curly/frizzy hair will be smoother with up to 100% less frizz. Subsequent blow-dry time will be cut 50% or more. If the client wants to wear the hair straight, it will be easier to do so using a blow dryer brush or flat iron.

Q. Who is Rejuvenol's instant Keratin Treatment for?

A. For the client who wants to keep the curls but wants to reduce volume due to frizz. For shinier, smoother, healthier hair. This treatment works best on porous or chemically processed hair. Applications on virgin hair will show the best results after the 2nd or 3rd Treatment.

Q. Is Rejuvenol's Brazilian Instant Keratin Treatment safe for highlighted, bleached, relaxed, damaged hair?

A. Rejuvenol's Brazilian Instant Keratin Treatment can be used on all hair types, and will actually improve the health, condition and shine of even the most damaged hair. For extremely damaged hair, it is recommended to lower the temperature of the flat iron to 350°-400° F. Hair that is breaking should not receive the service.

Q. How frequently can a client get a treatment?

A. Between 4 to 6 weeks or as needed.

Q. What happens after 4-6 weeks?

A. Hair will gradually return to its original state, but in better condition. The effect of consecutive and subsequent treatments is healthier, stronger hair.

Q. Can hair color be applied after a Brazilian Instant Keratin Treatment?

A. Yes, but it is recommended to wait 2 weeks.

Q. How soon can clients wash their hair or use hair products?

A. In 24 hours they could wash their hair. It is recommended to use Rejuvenol's products that are sodium chloride free and contains Keratin and collagen.

Q. What is the best way to offer

Rejuvenol's Brazilian Instant Keratin Treatment service to clients?

A. One of the most unique aspects of Brazilian Instant Keratin Treatment is that it can be done in conjunction with other services. Stylists can perform a hair cut during the processing time, meaning a Brazilian Instant Keratin Treatment can be added to a hair cut requiring only an extra 20 minutes.

Brazilian Instant Keratin Treatment can also be done immediately after a color service, sealing the color and creating vibrancy and shine like never before. After completing hair color service, blow dry 80% to 90% and continue with application, processing (cut during this step), blow dry and flat iron.

*Longevity is estimated based on a correct application and when the treatment is maintained using REJUVENOL's maintenance and styling products. Individual results may vary
